Gradworks Intern Development Program

The Gradworks Intern Development Program is designed to provide recent post-secondary graduates with challenging and career-focused positions within our network of Saskatchewan employers. These full-time internship positions of 12 months in length are intended to allow recent post-secondary graduates the opportunity to gain experience and to develop specific career-related skills. To be eligible for a Gradworks internship you must be a recent college, technical institute or university graduate, have little or no relevant work experience in your field of study and be eligible to work in Canada.

Responsibilities:

- Assist with research type project(s) that will require investigation of a new technological solution to a power plant problem, purchasing of new equipment, and installation/use of the new equipment.

Condition monitoring

- Responsible for plant equipment condition monitoring and performance evaluations on assigned generating units.
- This is a daily/weekly/monthly activity that will require using specialized diagnostics software to identify developing problems.

Problem troubleshooting and resolution

- Learn how power plant systems work to effectively troubleshoot problems.
- Problem resolution requires working with Plant staff, so strong interpersonal skills will be developed.
- Often field testing, using specialized test equipment will be required to quantify the problem.
- These investigations can be as short as a day or can extend over years.

Field Performance Testing

- Learn to plan field projects, develop safe work practices, coordinate field staff assistance, and execute testing under sometimes challenging situations.

Qualifications:

- Degree in Industrial or Mechanical Engineering.
- Good organizational skills
- Problem solving skills
- Communication skills
- Interpersonal skills

Additional Information:
